Los productos empleados están basados en resinas termoestables. Este tratamiento exclusivo introduce un pegado mediante Lignina. Un polímero natural que permite reducir un 50 % el fenol de la resina. La superficie final presenta un acabado especialmente liso.

Les produits utilisés sont à base de résines thermostables. Ce traitement exclusif introduit une collage à la Lignine, un polymère naturel qui permet de réduire de 50% le phénol présent dans la résine. La surface finale présente une finition particulièrement lisse.
